

Please don't pass this, make this one ruling you make on the right side, not like all the other anti-consumer rulings you have made for at least the last 10 years. The simple point of fact is if the broadcasters don't want their stuff recorded/timeshifted/watched on other media at the convenience of their consumers, don't broadcast the content. Again I beg don't make this like sat tv/cable tv/cell phones where every ruling you make was pro big business and anti american consumer. Thanks to recent rulings, many 3rd world countries lead the US in cell phone, broadband internet, and tv technology. Arrest the pirates, don't punish the consumers.
